Natural Beauty
Without Makeup!

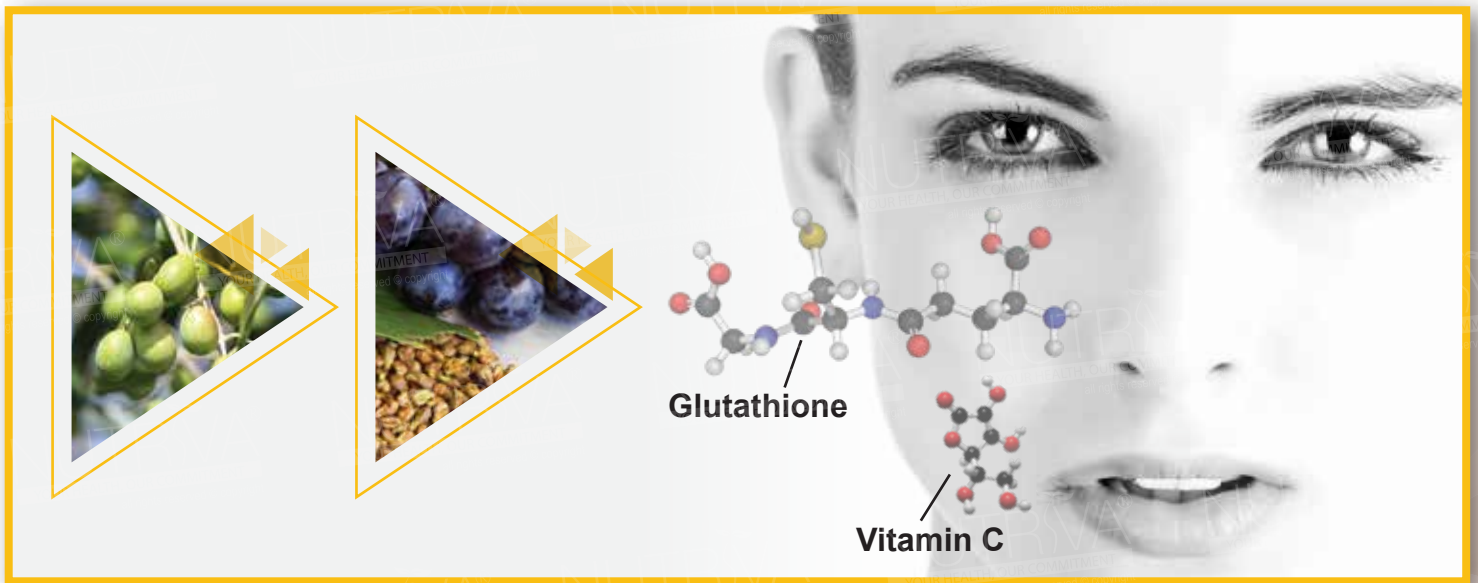

MAL16085009NC

Makeup just conceals a poor skin tone without addressing the underlying skin issues. Uneven skin tone develops due to an overproduction of melanin, the pigment that protects the skin from ultraviolet (UV) radiation. Sunlight is the main source of UV rays.

There are 3 main types of UV rays:

Glutathione (GSH) is a tripeptide comprised of glycine, cysteine, and glutamic acid, which is an antioxidant of the human body. It is essential for maintaining the proper functioning of the body system, protecting cells against oxidative stress, detoxifying the liver and minimising the risk of chronic illness. In healthy cells and tissue, more than 90 percent of the total glutathione pool is in the reduced form (GSH) and less than 10 percent exists in the disulfide form (GSSG). An increased GSSG-to-GSH ratio is considered indicative of oxidative stress and sometimes tissue dysfunction. Exposure to environmental toxins, pollution, poor diet, chronic stress and the use of some medications can cause the depletion of glutathione level in the body, which affects the well-being of every cell in the body and leads to premature aging includes the loss of skin radiance.

Glutathione

Vitamin C

Olive extracts contain high amounts of polyphenols, especially **hydroxytyrosol** that increases the glutathione (GSH) content for skin brightening.

Vitamin C is known as free radical scavenger and essential for collagen production. Vitamin C also raises glutathione levels by helping the body manufactures it, and glutathione helps recycle vitamin C. **Zinc** is needed for the formation and maintenance of the skin and mucous membranes.

L-Glutathione acts as detoxifier, demonstrates great antioxidant activity and promotes skin beauty

Grape seed extract is rich in powerful antioxidants and mitigates aging effects in the skin by protecting and strengthening collagen and elastin.

Bioperine® black pepper extract enhances the bioavailability of supplemented nutrients through increased absorption.

PRODUCT FEATURES & BENEFITS

OLIFERIN[®] WHITOLIVE

- ✓ Contain Kohjin's L-Glutathione, OleaA[®] olive extracts, grape seed extract, vitamin C, zinc (from yeast) and Bioperine[®] black pepper extract that work synergistically to rejuvenate the skin naturally and improve cellular health.
- ✓ Reduce dullness of skin.
- ✓ Deliver antioxidant protection and lower the risk of getting sunburn; repair skin damage from UV rays.

INGREDIENTS:

Each Vegetable Capsule Contains:

Olea Europaea (Olive Extract)	50mg
L - Glutathione	170mg
Vitis Vinifera (Grape Seed Extract)	50mg
Ascorbic Acid (Vitamin C)	170mg
Piper Nigrum (Black Papper Extract)	1mg
Zinc	1mg

INDICATION:

Used as health supplement.

DOSAGE:

Adult: take 2 capsules each time, once daily with meal.
