A-Rimau – A Unique Combination of Two National Treasures of Malaysia

A-Rimau contains a standardized, patented and clinically tested Tongkat Ali root extract (100:1) (US Patent: 7132117, EU Patent: 1313491), enhanced with a broad spectrum cultivated Tiger Milk Mushroom sclerotia powder (LiGNO TM02®) to significantly improve men's health and invigorate vital energy.

Tongkat Ali (Eurycoma longifolia), also known as Malaysian ginseng is widely distributed in Southeast Asia and has long been used as an energy tonic and remedy for low testosterone signs and symptoms. Our patented extract is compliant to Phytopharmaceutical Aspects of Freeze Dried Water Extract from **Tongkat Ali** Roots - Specification Malaysian Standard (MS 2409:2011). The **standardisation** of our **Tongkat Ali** root extract is based on four characteristics compounds (Eurycomanone, total protein, total polysaccharide and glycosaponin).

Testosterone is a principal sex hormone that is responsible for the development and maintenance of male attributes. Women also produce testosterone, but at much lower levels. After 30 years of age, testosterone levels decline approximately 1-2% annually. At the age of 60, testosterone levels are typically only 40-50% of youthful levels and may be lower due to chronic illnesses, some medications, stress and related lifestyle issues such as diet, exercise, and sleep patterns. The changes that may occur with low testosterone include mood disturbances, insomnia, increased body fat, low libido, loss of muscle mass and lack of energy.

Tiger Milk Mushroom (Lignosus Rhinocerus) is one of the highly -revered medicinal mushroom with more than 400 years history of use in Malaysia. It has traditionally been to **relieve symptoms of respiratory illnesses such as cough, cold and sinusitis**, as well as promoting vitality and supporting immunity. The medicinal value of TMM lies entirely within sclerotia (underground tubers). The tuber will lose its therapeutic benefits when it uses the nutrients to form the fruiting body. Despite its rareness in the wild, the prevailing successful cultivation method can produce a consistent supply of TMM and preserve its medicinal properties by harvesting the sclerotia at the best timing. Tiger Milk Mushroom addresses the body's needs as a whole via mechanism of cleansing, restoring, rejuvenating and protecting.

According to Traditional Chinese Medicine (TCM), a balanced Qi (vital energy) is important for good physical and mental health.

**People who do not have enough Qi
may have the following symptoms or signs:**

**Persistent
tiredness/
fatigue &
lethargy**

**Poor body's
defense system**

**Poor
circulation**
